Astm- a240 standard specification for chromium and chromium- nickel stainless steel plate, sheet, and strip for pressure vessels and for general applications mil- std- 1907 inspection, liquid penetrant and magnetic particle, soundness requirements for materials, parts, and weldments aws- d17. for annual book of astm standards volume information, refer to the standard' s document summary page on the astm website. note 1- - the dimensionless designator nps (nominal pipe size) has been substituted in this standard. 1520/ a0358_ a0358m- 19. astm- a358 - free download as pdf file (. this specification covers five classes of pipe as follows: class 1— pipe shall be double welded by processes employing filler metal in all. astm a358/ a358m- 15 standard specification for electric- fusion- welded austenitic chromium- nickel stainless steel pipe for high- temperature service and general applications 1. astm a358 – asme sa358 welded pipes for chemical and petrochemical industries high temperature and general corrosive service tp304/ tp304l - tp316/ tp316l - tp321/ tp321h welded thickness for astm a358 pdf all types of measurements the following tolerances must be considered: + 0 / – 0, 3mm outside diameter in the body. 1 this specification 2 covers electric- fusion- welded austenitic chromium- nickel stainless steel pipe suitable for corrosive or high- temperature service, or both, or for.
and grade filler metal classification and uns designation for applicableb aws specification a5. astm a358/ asme sa358 standard specificatioin for electric fusion welded austenitic chromium nickel alloy steel pipe for high temperature service1. standard specification for. designation: a358/ a358m – 15 a358/ a358m – 19 used in usdoe- ne standards. uns 304 sa 240 type 304 e308 w30810 er308 s30880 w30840 s30883 w30843 s30880 w30840 s30883 w30843 s30880 w30840. 4 available from american society of mechanical engineers (asme), asme. 1m specification for fusion welding for aerospace. approved in 1952. austenitic chromium- nickel stainless steel pipe for high- temperature service and general applications a0358_ a0358m- 19 astm. astm a358/ a358m- 19. pdf), text file (. astm a358/ a358m- 08a decem standard specification for electric- fusion- welded austenitic chromium- nickel stainless steel pipe for high- temperature service and general applications. astm - a358/ a358m. 2 for asme boiler and pressure vessel code applications see related speciþ- cations sa- 358 in section ii of that code. 1 this specification2 covers electric- fusion- welded austenitic chromium- nickel alloy steel pipe suitable for corrosive or high- temperature service, or both.
this standard is issued under the fixed designation a358/ a358m; the number immediately following the designation indicates the year. this specification covers electric- fusion- welded austenitic chromium- nickel stainless steel pipe suitable for corrosive or high- temperature service, or both, or for general applications. 1 this specification covers electric- fusion- welded austenitic chromium- nickel stainless steel pipe suitable for corrosive or high- temperature service, or both, or for. 3 for referenced astm standards, visit the astm website, www. txt) or read online for free. partner sites youtube to mp3 converter about us. in general a312 pipes are manufactured for a size up to 30 inches. org, or contact astm customer service at org. astm a358/ a358m- 19 standard specification for electric- fusion- welded austenitic chromium- nickel stainless steel pipe for high- temperature service and general applications 1. astm a358/ a358m- 08a standard specification for astm a358 pdf electric- fusion- welded austenitic chromium- nickel stainless steel pipe for high- temperature service and general applications 1.
this standard is issued under the fixed designation a358/ a358m; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision.

last previous edition approved in as a358/ a358m ð 15. this standard is issued under the fixed designation a358/ a358m; the number immediately following the designation. note 1— the dimensionless designator nps (nominal pipe size) has been substituted in this standard for such traditional terms as “ nominal diameter, ” “ size, ” and “ nominal size. org, or contact astm customer service at service. electric- fusion- welded austenitic chromium- nickel stainless steel pipe for high- temperature service and general applications1. 2 for asme boiler and pressure vessel code applications see related speci■- cations sa- 358 in section ii of that code. a358 pipes are usually manufactured up to a size of 48 inches.
* a summary of changes section appears at the end of this standard. 3 for referenced astm standards, visit the astm website, www. table: a358 vs a312. designation: a358/ a358m – 24. last previous edition approved in as a358/ a358m – 14a.
(pdf) format to. 1 this specification2 covers electric- fusion- welded auste- nitic chromium- nickel alloy steel pipe suitable for corrosive or high- temperature service, or both. download astm a358 free in pdf format. this standard is issued under the fixed designationa 358/ a 358m; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year. astm plate specification no. used in usdoe- ne standards. astm a358/ a358m- 01 standard specification for electric- fusion- welded austenitic chromium- nickel alloy steel pipe for high- temperature service. welcome to dlscrib. both a312 and a358 are stainless steel materials with astm designation having very good corrosion resistance. this specification covers electric- fusion- welded austenitic chromium- nickel alloy steel pipe suitable for corrosive or high- temperature service, or both. a358 pipes are usually cheaper. 1520/ a0358_ a0358m- 15.
